Subsidiary, DG Technologies, Co.,Ltd Established a New Plant in Miyagi, Japan

Please be informed that one of RS Technologies' subsidiaries, **DG Technologies Co.,Ltd (DG)** has established a new manufacturing plant and it has started production.

1. Background of New Plant

DG Technologies Co., Ltd manufactures consumable parts for etch system and their consumable parts are expected to be JPY 150 billion market.

DG has executed growth strategy with RST's business synergy in 2020 and it led to increasing demand from customers. In order to meet DG's customers' demand in a timely manner, DG not only made investment in the existing manufacturing plant in Kamisu-city, Ibaraki, but also launched a new manufacturing plant in Kurihara-city, Miyagi, which is stationed in near RST's reclaimed wafer's mother plant, Sanbongi Factory at Osaki-city, Miyagi.

2. Overview of New Plant

Factory name	DG Technologies Kurihara-Factory
Location	Muyari, Wakayanagi, Kurihara-shi, Miyagi 989-5508 JAPAN
Building Area	5,000m ²
Production Schedule	May, 2021

3. Outlook

The impact on consolidated performance in FY2021/12 by this event will be minor.
