

RST's consolidated subsidiary, DG Technologies and Kurihara city government made an agreement

2021.05.26.

In order to meet customers' demand, one of RS Technologies' subsidiaries, DG Technologies (DG) established their second manufacturing plant (Kurihara Plant) in Kurihara-city, Miyagi, JAPAN.

The new plant is stationed in near RS Technologies' reclaimed wafer plant, Sanbongi Factory at Osaki-city, Miyagi. Since the beginning of this May, the Kurihara plant has already begun the production.

RST's CEO, Nagayoshi Ho and other company officers visited Kurihara city yesterday and made an agreement on the establishment of the Kurihara plant with Kurihara city government.

Under this agreement, it is likely that DG is able to receive Kurihara city's cooperation such as recruitment of employees and promotion of the plant.

Stable production at Kurihara plant will lead to expanding the production capacity and making a great contribution to the Kurihara city.
